Employment - Post-Doc Positions

Guide for Postdoctoral Fellows

- Postdoctoral fellow position to work on Engineering Development
  Position Start: March 31, 2018
  Application Deadline: March 10, 2018

Research Program Overview

Two postdoctoral fellow positions are available in the Zandstra Stem Cell Bioengineering laboratory (http://stemcellbioengineering.ca/), which is in the School of Biomedical Engineering, and is affiliated with the Michael Smith Laboratories, at the University of British Columbia's Vancouver campus. The successful candidates will be expected to investigate the use of pluripotent stem cells in modeling early development and tissue specification. This well-funded multidisciplinary program integrates...
