Employment - Research Associate Positions

- **Research Associate Position in Microfluidics & Instrumentation**
  Position Start: June 1, 2018
  Application Deadline: April 12, 2018
  A Research Associate position is available in the Michael Smith Laboratories at The University of British Columbia. This position provides high-level laboratory experimentation and group support for a project working on development and testing of microfluidic devices and associated instrumentation for immune profiling using single cell analysis. Working within an interdisciplinary team environment, the applicant will have the chance to apply and integrate a variety of engineering, microscopy, and software methodologies to improve and optimize an existing instrument prototype.

- **Research Associate for an Interdisciplinary Translational Research Program in Stem Cell Bioengineering**
  Application Deadline: April 30, 2018

  **Position Title:** Research Associate

  **Location:** Biomedical Research Centre, University of British Columbia, Vancouver Canada

  **Position Description:** The UBC School of Biomedical Engineering, Faculty of Medicine, invites applications for a Research Associate to join an interdisciplinary translational research program in stem cell bioengineering. The Research Associate will work directly under supervision of Dr. Peter Zandstra at the Biomedical Research Centre.

  **Duration:** The position will begin ASAP.
