Seminars

Click the title to view full event details.

- **Department of Microbiology and Immunology MICB Postdoctoral Seminar - Dr. Shannon Soucy**
  
  February 21, 2017 - 12:30pm  
  Domestication of a prophage in the Alphaproteobacteria  
  Dr. Shannon Soucy

- **Botany Seminar- Prof. Juli Carrillo**
  
  February 21, 2017 - 12:30pm  
  'Impacts of tomato domestication on biotic interactions, above- and below ground'  
  Prof. Juli Carrillo

- **BCCA Research Seminar Series - Dr. Peng Huang**
  
  February 27, 2017 - 12:00pm  
  ‘Computer-aided image analysis and its application in lung cancer screening’  
  Dr. Peng Huang

- **BMB Seminar - Dr. Julie Forman-Kay**
  
  February 27, 2017 - 3:00pm  
  “Disordered Protein Interactions in CFTR Regulation and Cellular Organization”  
  Dr. Julie Forman-Kay

- **Department of Microbiology and Immunology Seminar - Dr. Pedro Dimitriu**
  
  February 28, 2017 - 12:30pm  
  Skin microbiome variability in relation to host aging and lifestyle  
  Dr. Pedro Dimitriu

- **Department of Botany Exit Seminar- Sishuo Wang**
  
  February 28, 2017 - 12:30pm  
  'Evolutionary dynamics of non-coding RNAs in flowering plants'  
  Sishuo Wang

- **Botany Exit Seminar- Shumin Wang**
  
  March 2, 2017 - 12:30pm  
  'Role of Arabidopsis KNOTTED-LIKE (KNOX) transcription factors in the regulation of secondary cell wall development'  
  Shumin Wang

- **BMB Seminar - Dr. Daniel Siegwart**
  
  March 6, 2017 - 3:00pm  
  “Design of arriers for delivery of short and long RNAs: from miRNA replacement therapy to CRISPR/Cas gene editing”  
  Dr. Daniel Siegwart

- **Department of Microbiology and Immunology Seminar - Meghan Verstraete**
  
  March 7, 2017 - 12:30pm  
  A regulatory mechanism for heme iron preference in Staphylococcus aureus  
  Meghan Verstraete

- **BMB Seminar- Dr. David Schriemer**
  
  March 13, 2017 - 3:00pm  
  “Integrative structural biology using mass spectrometry: the push towards structural proteomics”  
  Dr. David Schriemer

- **AMPEL Special Seminar - Dr. Qinghuang Lin**
  
  April 25, 2017 - 11:30am  
  Wafer-Scale Nanofabrication of Fluidic Microchips for Detecting and Controlling Single DNA Molecules  
  Dr. Qinghuang Lin

- **Dept of Microbiology & Immunology Seminar - Dr. Andrew Cameron**
  
  April 25, 2017 - 12:30pm  
  The genetic regulation of antibiotic resistance and bacterial competition  
  Dr. Andrew Cameron

- **Dept of Microbiology and Immunology Seminar - Dr. Carrie Rosenberger**
  
  April 26, 2017 - 2:30pm  
  Understanding disease heterogeneity to support development of novel infectious disease therapies  
  Dr. Carrie Rosenberger

- **Dept of Botany - John Russell**
  
  April 27, 2017 - 12:30pm
Managing Western redcedar gene resources
John Russell

- **BRC Seminar Series Presents: Dr. David Glass, M.D.**
  April 28, 2017 - 4:00pm
  Mechanisms mediating skeletal muscle mass, function and aging
  Dr. David Glass, MD

- **Dept of Microbiology & Immunology Seminar - Dr. Neetu Gupta**
  April 28, 2017 - 4:00pm
  B Lymphocyte activation in health and disease: orchestration at the membrane-cytoskeletal interface
  Dr. Neetu Gupta

- **Dept of Microbiology & Immunology Seminar - Dr. William Martin**
  April 28, 2017 - 4:00pm
  The physiology and habitat of LUCA
  Dr. William Martin

- **Dept of Botany Guest Speaker - Barbara Valent**
  May 2, 2017 - 12:30pm
  Ancient and emerging diseases caused by the highly evolved cereal killer Magnaporthe oryzae
  Barbara Valent

- **Single Cell Sequencing Seminar 10x Genomics & BRC-Seq**
  May 2, 2017 - 2:30pm
  Single Cell Analysis Using the Chromium System: digital Gene Expression and Paired TCRs
  Tarjei Mikkel
  Deep Profiling of the Innate Immune Response During Neurological Disease
  Coral-Ann Lewis, PhD

- **Dept of Botany - Shijun You (Jerry) Exit Seminar**
  May 4, 2017 - 12:30pm
  Population genetics and phylogeographical studies on Plutella xylostella
  Shijun You (Jerry)
