

## Proteomics Core Facility

 [spray.jpg](#)

Since 2002, the PCF has been providing mass spectrometry and proteomic services to over 35 departments at UBC, as well as other Lower Mainland research labs including universities, non-profit organizations, hospitals, and biotechnology corporations. The facility has grown to include 8 mass spectrometers covering all forms of protein/peptide analysis, as well as robotic digestion and a myriad of upstream fractionation systems. Specializing in characterizing post translational modifications and quantitative proteomics, the facility has the ability to provide comprehensive analysis for a broad range of proteomics projects using the latest techniques. The fee-for-service structure is open to all researchers across North America. Training on specific equipment can also be arranged through the Long Term Collaborators program with web-based calendar booking and hourly rates for self-service.

Please contact our Analytical Specialist, Jason Rogalski ([proteomics@mssl.ubc.ca](mailto:proteomics@mssl.ubc.ca)), to arrange for a no-cost consultation.

Located in the NCE building, the CHiBi PCF is open Mon-Fri, 9 AM to 5 PM PST. More information, including sample preparation; a description of all analytical services, equipment as well as an electronic submission form can be found on our web page: <http://www.chibi.ubc.ca/facilities-2/proteomics-core-facility-3/proteomics-core-facility/>

### PCF Director

Dr. Leonard Foster  
Office (NCE 416): 604-822-8311

### Laboratory Staff

Jason Rogalski  
Office (NCE 344): 604-827-5209

[proteomics@mssl.ubc.ca](mailto:proteomics@mssl.ubc.ca)

### Mailing Address

CHiBi Proteomics Core Facility  
Room 345-2125 East Mall  
Vancouver BC V6T1Z4 CANADA

### Sample drop off (in person ONLY)

Open Mon-Fri, 9 AM-5 PM, PST

CHiBi Proteomics Core Facility  
NCE Building, Room 436  
2125 East Mall
