# Biochemistry & Molecular Biology Seminars

## Department of Biochemistry & Molecular Biology

University of British Columbia
604.822.3178 | www.biochem.ubc.ca

MORE INFORMATION PLEASE CONTACT
Dr. Calvin Yip at 604.827.3976,
Dr. Christian Kastrup at 604.827.3749,
or visit
www.biochem.ubc.ca
January 2018

Jan 15th, 2018
Lipoprotein(a): The Story of Clinical Probability and Scientific Uncertainty
Dr. Marlys Koschinsky
Western University

Jan 22nd, 2018
Highly fluorescent RNA Mango aptamers for in vitro imaging and RNP purification
Dr. Peter Unrau
Simon Fraser University

March 2018

March 12th, 2018
Mitochondrial Fe-S cluster assembly machinery
Dr. Mirek Cygler
University of Saskatchewan

April 2018

April 9th, 2018
Engineering development from stem cells
Dr. Peter Zandstra
University of British Columbia
MSL & School of Biomedical Engineering

April 23rd, 2018
Viral strategies to hijack and alter host cell functions during picornavirus replication
Dr. Bert Semler
University of California, Irvine

April 30th, 2018
Electron microscopy approaches to studying lipid-protein interactions
Dr. Thomas Walz
The Rockefeller University

May 2018

May 28th, 2018
Cysteine arylation to engineer and discover proteins
Dr. Bradley Pentelute
Massachusetts Institute of Technology

June 2018

June 5th, 2018
Specialized Ribosomes: A New Frontier in Gene Expression and Organismal Biology
Dr. Maria Barna
Stanford University
